

U of A International Marmot Basin Ski Trip 2025

Preparation for your trip:

Please make sure you have the proper winter gear. Wind chill can change the temperature dramatically up at the Ski Resort. To ensure that you enjoy your day please wear/bring:

- A breathable base layer to remove perspiration.
- A mid-layer to keep you warm. It could be a fleece, or a light insulated jacket worn over your thermal base layer.
- An outer layer (Jacket) to protect you from the elements.
- Neck warmer, even a thin one or scarf, will give you good additional protection against the cold and the wind.
- Snow pants with thermal underwear underneath.
- Gloves that are waterproof and not too tight if you get cold hands.
- Ski socks made from synthetic fibers or from merino wool.
- Goggles offer better protection than sunglasses.
- Sun Protection...Apply sunscreen. Even those individuals that tan will be exposed to extreme UV levels due to the high elevation, on sunny and cloudy days, so please apply sunscreen regularly throughout the day.
- Dehydration also occurs more quickly at this altitude, so be sure to drink plenty of water during your ski day.
- Ride carefully and stay within the resort boundaries.
